AUDITORS

M/s. Ford Rhodes Sidat Hyder & Co., Chartered Accountants

REGISTERED OFFICE

2ND Floor, Pakistan Handicraft Building, Abdullah Haroon Road, Karachi

I am pleased to present Financial Statements of the Company for the period July-September 2008 on behalf of Board of Directors. Key operational and financial results are listed below:

	Jul-Sep 2008 (In Millio	Jul-Sep 2007 ns KwH)
OPERATIONAL		
Units generated KESC	2,291	2,416
Unites sent out KESC	2,117	2,235
Units purchased	1,899	1,953
Total units available for distribution	4,016	4,188
Units billed	2,667	2,696
`Transmission & Distribution Losses %	33.6%	35.61%

	(Rupees in Million)	
FINANCIAL Sale of Energy Other Revenue Gross Revenue	16,270 	13,705 489 14,194
Cost of fuel & power purchase -(Net of Subsidy)	<u>(18,535)</u> (1,828)	(14,632) (438)
O&M Expenses Provision for doubtful debts Depreciation Financial & other charges	(2,689) (375) (946) (750)	(2,490) (338) (888) (494)
(Loss) before tax Loss per share	(6,588) Re. (0.50)	(4,648) Re. (0.36)

KESC own generation has decreased by 5.15% during the period Jul-Sep 08 over the corresponding period last year which is mainly attributable to 12.4% reduction in generation at BQPS which was partly offset due to increased generation at other plants by 7.25%. Total KESC units sent out decreased by 5.25% as a result of 5.15% reduction in KESC generation. Power purchases decreased by 2.78% over corresponding period last year due to short supply from WAPDA by 5.4% which was offset by increased purchases from other sources. Total units available for distribution decreased by 4.11%, whereas units billed decreased by only 1.08% as compared to 4.11% lesser number of units available for distribution which were contributed through significant reduction of 2% in T&D losses from 35.61% in Jul-Sep 07 to 33.60 in Jul-Sep 08.

Revenue from sale of energy has gone up by 18.7% due to enhancement of average selling rate by 10% and 35% on account of tariff increase allowed by NEPRA from 01 March 2008 and 01 September 2008 respectively. The issue of 35% tariff increase allowed by NEPRA is under review by a Committee constituted by GOP, pending GOP's decision necessary adjustments, if any will be made.

Increase in revenue was more than offset by phenomenal increase in fuel bill by 19.45% notwithstanding

5.15% reduction in KESC own generation which is exclusively attributable to increase in cost of furnace oil and steep rise of approximately 38.2% in gas prices over corresponding period last year. Consequently, fuel bill spiraled by Rs.1,880 million over corresponding period last year which adversely impacted the bottom line of P&L account. Cost of power purchases increased by 24.28% despite 2.78% reduction in number of units purchased which is exclusively attributable to significant increase in furnace oil price registered during the period under review which translated into additional financial burden on the Company in respect of power purchases from furnace oil based IPPs. Operation & Maintenance (O&M) expenses increased by 8% mainly due to enhancement in pay and allowances given to the employees of the Company, repair & maintenance cost of generation facilities and T&D infrastructure whereas 52% increase in financial and other charges over corresponding period last year is attributable to interest on delayed payments to SSGC and increased bank borrowings. Loss before tax, as a result of cumulative impact of contributing factors as above, increased by 41.74% from Rs.4,648 million to Rs.6,588 million, which is mainly attributable to inflated fuel bill and power purchases partly offset by increased revenue through additional billing as a result of 2% reduction achieved in T&D losses. It is pertinent to mention that cost of fuel & power purchase, depreciation and financial charges collectively constitute approximately 87% (Rs.20,231 million) of total expenditures (Rs.23,295 million) of the Company which are, by and large, beyond the control of Management.

Activities under Review

Generation

Contract for setting up 220 MW combined cycle power plant at KTPS was awarded in January 2007. Gas Turbine Units-1 & 2 have already been synchronized with the system and are undergoing various commissioning tests, whereas third and fourth GTs of identical generating capacity are likely to be commissioned by November 2008 and Steam Turbine of 26.378 MW would be operative in July 2009.

Contract for setting up new power plant phase-II BQPS extension of 560 MW combined cycle project has been awarded in June 2008. The project comprises of three (3) GTs of 128.90 MW each (ISO capacity) and one (1) Steam Turbine of approximately 185 MW and the project is likely to be commissioned in the year 2010-11.

De-rating of the existing generating capacity spanning over last couple of decades has been arrested through a systematic maintenance and rehabilitation plan as a result of which generating capacity has been enhanced by approximately 190 MW.

Transmission & Distribution

An outdated and dilapidated transmission and distribution infrastructure was inherited by the owners and overloading of the twin networks was also responsible for high technical energy losses in the transmission & distribution system in addition to administrative losses.

Strategic Plan with implementation mechanism was prepared for rehabilitation of transmission and distribution network which has been under execution in a phased and prioritized manner. A number of critically important projects have been commissioned or are in the final stage of completion which have relatively improved network reliability and increased transmission & distribution capacity and reduced technical losses. During the year under review the four (4) GIS grid stations were completed and commissioned. Whereas nine (9) 132 KV GIS Hybrid Grid Stations are in various stages of completion and shall be commissioned in a phased manner by 17 November 2008 which would further improve network reliability and capacity of the transmission network.

Establishment of computerized system for management of generation, transmission and distribution known as SCADA had been planned and is being executed as one of the prioritized projects and provisional taking over of the project is scheduled by 31 March 2009. The commissioning of this critically important project

would significantly improve efficiency of power system control & monitoring, facilitate timely operational decisions & economic dispatch of power and would minimize outages and technical losses.

During the year under review, distribution system has been augmented & expanded through significant addition of 11KV overhead & underground lines and 400V overhead & underground lines and 11KV distribution substations / PMTs.

Commitment & Support of the Owner

The commitment, support and interest of the owners and GOP to transform the company into an efficient and profitable organization are evident from the below given facts:

- i. Equity injection of Rs.6 billion (USD 100 M) through Redeemable Preference Shares (RPS) by KES Power (74.1%) and GOP (25.65%) to finance equity component of cost of new power plants.
- ii. The financing facilities from local & international lenders for enhancing generation capacity through setting up of new power plants, could only be managed with the sponsors support and their corporate guarantees. Financing arrangements for such a colossal sum of USD 125 M from IFC, USD 150 M from ADB and PKR 8,000 M from local syndicate were simply not possible on the strength of KESC's balance sheet..
- iii. In May 2007, the new owners arranged another USD 50 M to meet their obligation towards capital expenditure (primarily on network) to add to the FIP of the GOP.
- iv. The GOP funded Financial Improvement Plan (FIP) has also been contributing positively towards system improvement and loss reduction.
- v. Owners have further arranged USD 15 M in October 2008 to help the Company meet its working capital shortfall.
- vi. Owners provided Equipment Guarantee to Aggreko International Project Limited in an amount of USD 10 M for 50 MW rental generation facility to be phased in up to March 2009 in order to party meet the summer of 2009's power demand of the city.

The above steps clearly indicate commitment, determination and support of the owners to steer the company out of financial, operational, technical and other difficulties besetting the company and make it an efficient & profitable entity and to actively & positively contribute in socio-economic growth of city of Karachi in particular and the country in general.

Future Prospects

Mr. Naveed Ismail has assumed the position of Chief Executive Officer of the Company effective from 16 September 2008 in place of Syed Muhammad Amjad and Mr. Jalil Tarin has replaced Mr. Muhammad Asghar as Chief Financial Officer of the Company.

Mr. Naveed Ismail is a high profile professional engineer and possesses hands on experience and exposure in power sector and has a proven track record of managing companies operating under difficult circumstances and successfully turning them into efficient & profitable entities in Kazakistan, Ukraine, Georgia, Chile and Argentina. Mr. Jalil Tarin, a senior chartered accountant, who brings with him rich experience of financial management in local environment in a professional manner matching international standards.

In addition a team of professional engineers and managers representing core activity areas and possessing

experience, expertise and specialized skills in relevant fields, has been brought in Generation, Transmission & Distribution, Human Resources, Supply Chain, Information Technology, Treasury, Finance & Accounts, Communication and Contract Specialists in order to implement a comprehensive strategy emphasizing an essential and positive change in both qualitative and quantitative areas of operations & management and to introduce cultural and corporate structural changes designed to introduce best practices framework and corporate governance across all areas of business operations focusing on main objectives of turning the company around. The services and experience of existing human resources of the Company will also be productively utilized in a competitive, equal-opportunity and merit-based environment.

The main focus and concentration shall continue to be on improving the core activity of the Company and bridging the prevailing gap between electricity demand and supply and also to cater for additional future demand. Concerted efforts shall be made for delivery and commissioning of new power plant phase-I of 220 MW and phase-II of 560 MW within the set time-lines in order to benefit the valued consumers of the Company, Karachi based industries and national economy at large in disregard of short term commercial interest of the Company. The past policy of deferring generation capacity enhancement which resulted in no injection of fresh generation capacity since 1997 has been done away with, in the best national interest. The measures taken to-date have brought about an increase of approximately 190 MW in the existing generation capacity which shall further be enhanced on sustainable basis. All the options are being explored and exercised in order to meeting ever-increasing electricity demand on short, medium and long term basis. A number of power rental proposals are under negotiation and the Company has recently entered into a Power Rental Agreement with M/s. Aggreko International Project Limited for generation facilities of 50 MW which shall be phased in and commissioned by early March 2009 and shall help partly meet the summer of 2009's electricity demand.

The structured and systematic approach adopted by the Company to address each issue with the objective of improving output and services and relationship with customers shall be continued and reinforced in future.

Improving & expending network infrastructure, reducing technical & administrative losses, developing human resources capital of the Company and improving quality & standard of customer service shall continue to be among the top priority areas, to benefit all stakeholders. The concerted efforts of the management are likely to produce improved operating & financial results in future.

POST BALANCE-SHEET EVENT

Subsequent to the balance sheet date, principal shareholder of the Company, KES Power Limited (KES Power) has entered into an agreement with, a special purpose vehicle (Abraaj) managed by Abraaj Investment Management Limited pursuant to which Abraaj will, subject to fulfillment of certain conditions precedent (including regulatory and contractual approvals), subscribe for new shares in KES Power resulting in Abraaj holding 50% of the increased share capital of KES Power and having principal management control of KES Power.

Acknowledgements

The Board wishes to extend its gratitude to the GOP, shareholders and customers for their cooperation and support and appreciation to the employees of the Company.

Naveed Ismail Chief Executive Officer

NOTES TO THE CONDENSED INTERIM FINANCIAL STATEMENTS For the Quarter Ended September 30, 2008 (Unaudited)

1. THE COMPANY AND ITS OPERATIONS

The Karachi Electric Supply Company Limited (the Company) was incorporated as a limited liability company on September 13,1913 under the Indian Companies Act, 1882. The Company is listed on Karachi, Lahore and Islamabad stock exchanges. During the preceding financial year 2007-08, the Company changed its name from The Karachi Electric Supply Corporation Limited to The Karachi Electric Supply Company Limited.

The Company is principally engaged in the generation, transmission and distribution of electric energy to industrial and other consumers under the Electricity Act, 1910, as amended to-date, to its licensed areas.

The registered office of the Company is situated at 2nd Floor, Handicraft Chamber, Abdullah Haroon Road, Karachi.

2. STATEMENT OF COMPLIANCE

These interim condensed financial statements are un-audited and are being submitted to the shareholders as required under section 245 of the Companies Ordinance, 1984 and have been prepared in accordance with the requirements of the International Accounting Standard 34, "Interim Financial Reporting" as applicable in Pakistan.

3. ACCOUNTING POLICIES

The accounting policies adopted and methods of computation followed for the preparation of these three months interim condensed financial statements are the same as those applied in the preparation of the preceding annual financial statements of the company for the year ended June 30, 2008.

14 TAXATION

By virtue of the change in Income Tax Ordinance, 2001, minimum turnover tax has been abolished effective from July 01, 2008, hence no provision has been made in these financial statements.

15 TRANSMISSION AND DISTRIBUTION LOSSES

15.1 The transmission and distribution losses were 33.60% (June 2008: 34.12%). The trend of transmission and distribution losses over the years is as follows:

ine yeare le de lenementer	
2000-2001	36.81%
2001-2002	41.11%
2002-2003	40.78%
2003-2004	37.84%
2004-2005	34.23%
2005-2006	34.43%
2006-2007	34.23%
2007-2008	34.12%
September-08	33.60%

15.2 One of the factors attributable to these losses is the theft of electricity, which cannot be billed as it is subject to identification, which has directly affected the profitability of the Company. No consideration has been given to units over billed in prior years and corrected during the year in the determination of transmission and distribution losses percentage as disclosed above.
