

AASAAN Meter Below 80 KILOWATT – FAQs

Q: Where can I get information for my new connection? OR What is the fastest way to apply for my new connection?

A: Get all information at your fingertips & apply from the comfort of your home for your new connection application via:

- KE Website (<https://www.ke.com.pk/customer-services/new-connections/>)
- KE Live App (<http://onelink.to/kelive>).

Alternatively, you may also visit your nearest Customer Care Centre.

Q: Which services are offered under the new connection?

A: You can avail below facilities by filling out the same New Connection Form and submitting the required documents:

1. **New Connections:** This is the first meter that energizes a newly completed unit.
2. **Additional Meters:** For a premises with separate portion, KE will allow more than one connection at the same premises subject to the following:
 1. Separate Portions
 2. Separate electric circuits
 3. Separate kitchens
 4. Separate entrance/access
3. **Temporary Line Connections:** A temporary solution provided to premises under construction, rebuilding, or expansion of existing premises where no meter exists.
4. **Load Extension:** In case of increase in power consumption, you may apply for load extension.
5. **Load Regularization:** You will be issued a load regularization notice in case your actual power consumption exceeds the sanctioned load.
6. **Reinforcement:** Consumers should select this option when upgrading to a three-phase meter from a single-phase meter.

Q: How many types of meters are there?

A: There are 3 types of meters:

- **Single phase Meter:** this type of meter is for domestic and small commercial enterprises with a load requirement of up to 4 kW.
- **Three Phase Meter:** this type of meter is for residential, commercial, and small industrial premises with a load requirement of up to 40 kW.
- **CTO Meter:** this type of meter is for large commercial and industrial units with a load greater than 41KW.
(*On single point metering only)

Q: What is the EIK Test form & how can I get it?

A: Test Form is an electrical wiring certificate, and it is issued by EIK (Electrical Inspector Karachi) and approved by authorized contractors from the EIK, to confirm that the internal wiring of premises conforms to the required standards. To obtain your test form you must visit any of the below mentioned EIK offices.

- EIK Address Region 1: Mechanical & Soil Lab Irrigation Building, Shaheed-e-Millat Road, Baloch Colony
- EIK Address Region 2: Plot No 2, Black-N, Nazimabad Town, Karachi.
- EIK Address Region 3: Suit 503, 5th Floor, Al-Ameera Center, Near Passport Office Saddar

Q: When will my new connection be energized?

A: Your new connection will be energized within a month (30 days) *

*Provided that all prerequisites are met.

Q: What are the reasons for Application rejection?

A: your new connection request will get rejected under following circumstances

- Ensure that there are no outstanding dues on existing meter & all previous bills are cleared with the concerned Customer Care Centre
- Premises under construction phase may not be provided with utility connection under NEPRA regulation.
- In case of merging of two separate plots, meter will not be installed until a clear bifurcation is provided.

- Survey is a prerequisite for getting your new connection. If KE team isn't allowed to conduct the survey at the premises, then this would result in rejection of your application.
- Nonpayment of Estimate and Security Deposit
- Non-submission of required documents

Q: What is the qualifying criteria for a Commercial meter in an individual house?

A commercial meter may only be installed in cases where the individual house is also being used for commercial activities. This would be assessed by the surveyor during the survey process.

(*Commercial use describes any activity in which you use a product or service for financial gain.)

Q: On an existing meter, can a Commercial tariff be converted to an Industrial tariff?

A: A commercial tariff cannot be converted to an Industrial tariff. The customer will have to apply for an industrial meter via the new connection process.

Q: Are National Tax Number (NTN) & Active Taxpayer List (ATL) of blood relative or tenant acceptable for submission of Commercial and Industrial new connection cases?

A: For submission of Commercial & Industrial new connection:

- NTN & ATL of blood relative is acceptable
- NTN & ATL of tenant will be acceptable based on tenancy agreement

Q: Is ownership doc required in Load Extension/Load Regularization & Reinforcement cases?

A: If registered applicant name is appearing on bill, then no ownership documents are required.

Q: For Load Regularization, is there any validity of notice served by IBC?

A: Load Regularization notice served by IBC is valid for 3 months.

Q: How many common meters are permitted in multi-story building?

A: Two common meters are permitted in a multistory building

- One meter for water pump/lobby/corridor/parking area/ play area
- One meter for lift.

Q: What does under construction premises mean?

A: Under construction premises are those properties or buildings where the construction process is ongoing, including activities such as foundation work, framing, and finishing.

Q: Difference between Scheme and Non-Scheme cases?

A: If there is a requirement of dedicated distribution system (DDS) i.e., PMT, Feeder or Grid, then it is qualified as a scheme case. If there is no requirement of DDS, then it is qualified as a non-scheme cases, usually fed by Common Distribution System (CDS).
