

NC FAQs-Industry

Q: Where can I get information for my new connection? OR What is the fastest way to apply for my new connection?

A: Get all information at your fingertips & apply from the comfort of your home for your new connection application via:

- KE Website (<https://www.ke.com.pk/customer-services/new-connections/>)
- KE Live App (<http://onelink.to/kelive>).

Alternatively, you may also visit your nearest Customer Care Centre.

Q: What other services are offered under new connection?

A: You can avail below facilities by filling out the same New Connection Form and submitting the required documents:

- **New Connections:** This is the first meter that energizes a newly completed unit.
- **Additional Meters:** Additional meter is provided in case some part of the premises has been rented & the new entity must have a new registered NTN along with different nature of business.
- **Temporary Line Connections:** A temporary solution provided to industries under construction, rebuilding, or expansion of existing premises where no meter exists.
- **Load Extension:** In case of increase in power consumption, you may apply for load extension.
- **Load Regularization:** You will be issued a load regularization notice in case your actual power consumption exceeds the sanctioned load you must apply for load regularization.

Q: How do I track my new connection progress?

A: You may use your registration ID to track your case online on the KE website (<https://www.ke.com.pk/customer-services/new-connections/>) or connect with your dedicated relationship manager.

Q: What is the EIK Test form & how can I get it?

A:

Test Form is an electrical wiring certificate issued by EIK (Electrical Inspector Karachi) and approved by authorized contractors from the EIK, to confirm that the internal wiring of premises conforms to the required standards. To obtain your test form you must visit any of the below mentioned EIK offices.

- EIK Address Region 1: Mechanical & Soil Lab Irrigation Building, Shaheed-e-Millat Road, Baloch Colony
- EIK Address Region 2: Plot No 2, Black-N, Nazimabad Town, Karachi.
- EIK Address Region 3: Suit 503, 5th Floor, Al-Ameera Center, Near Passport Office Saddar

Q: What can cause delay in my new connection?

A: Please note your New Connection can be delayed under following circumstances.

- Outstanding electricity dues on premises
- If Power Factor Improvement Plant (PFIP) of mentioned KVAR rating isn't installed before energization
- Industry Consumer must provide a load bank along with PFIP to ensure at least 25% of sanctioned load is available at energization.
- Delay in submission of Right of Way (ROW) against the scheme drawing provided by KE.

Q: Under what circumstances will my new connection application get rejected?

A: Your new connection request will get rejected under following circumstances

- Ensure that there are no outstanding dues on existing meter & all previous bills are cleared with the concerned Customer Care Centre
- Industries under construction phase may not be provided with utility connection under NEPRA regulation.
- In case of merging of two separate plots, meter will not be installed until a clear bifurcation is provided.
- Survey is a prerequisite for getting your new connection. If KE team isn't allowed to conduct the survey at the premises, then this would result in rejection of your application.
- Nonpayment of Estimate and Security Deposit will result in rejection of your application.
- Non-submission of required documents will result in rejection of your application.
- Non provision of space for substation, meter and PMT installation can also result in case ID rejection.

Q: What is Right of Way & why is it needed?

A: Right of Way (ROW) is a road cutting permission required from your concerned Civic Agency to install KE infrastructure. Scheme drawing provided by KE team must be submitted to the concerned Civic agency.

Q: Can I apply for an industrial connection if my plot category is residential or commercial in the property documents?

A: No, you cannot apply for an industrial connection if your plot category is residential or commercial in the property documents. Industrial connections are only allowed for premises that fall under the industrial category as mentioned in the property documents.

Q: Difference between Scheme and Non-Scheme cases?

A: If there is a requirement of dedicated distribution system (DDS) i.e., PMT, Feeder or Grid, then it is qualified as a scheme case. If there is no requirement of DDS, then it is qualified as a non-scheme cases, usually fed by Common Distribution System (CDS).
